

## **BALLAST BLASTER EXCAVATOR AND BACKHOE TRACK UNDERCUTTERS**

**DymaxRail Ballast Blaster Undercutters** outperform all other methods for ballast removal. Some rail networks prefer it to conventional on-track ballast cleaners, as they are more efficient and easier to get on and off track, especially congested networks with severe time restraints. Our Ballast Blaster Undercutter will more than double productivity and cut operating costs by more than half! Get the work done within limited track time. The Ballast Blaster is the safest to operate and easiest to maintain undercutter on the market. It exceeds the productivity and durability of every other brand of undercutter.

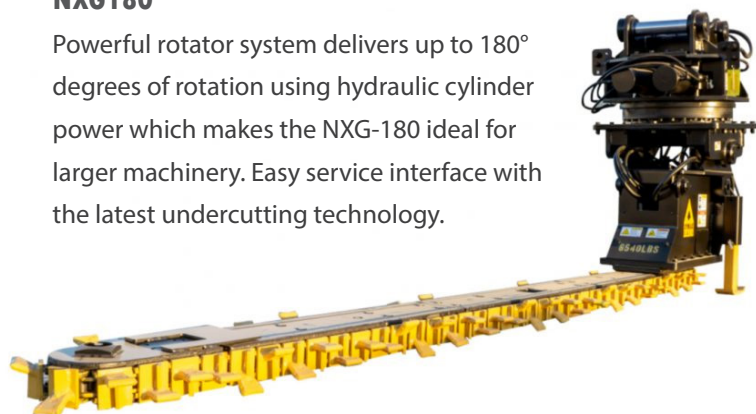

## **TRACK UNDERCUTTING SIMPLIFIED**
