

BALLAST PLOW

RAILWAY BALLAST PLOW ATTACHMENT

Dymax Railway Ballast Plows are ideal for maintaining clean rail in dirty applications. A Dymax Ballast Plow quickly attaches to a front end loader or backhoe loader and features integrated rail wheels providing smooth guidance on rail as the operators drive forward. Spread ballast or clean spilled materials such as sand, gypsum, silica, aggregates and coal dust. The V design allows the material in the center to move to the outside of the rails. Available with choice of bolt on poly or rubber edges. Custom design solutions available.

TRANSFORMING RAIL MAINTENANCE
